## Product Features

- Complete Multi Model tow bar wiring connection solution for your vehicle.
- Supports Euro multiplex systems / PWM (pulse-width modulation)
- LED Trailer Light Compatible
- Wide operating voltage range 9V to 15V
- Includes a 7P/12V Flat watertight socket (IPX9K, IPX7)
- Brake controller connection point provided<sup>1</sup>
- Wide operating temperature range -40°C to +85°C

1. Tested to work seamlessly with the CURT Spectrum™ brake controller

2. Excluding vehicle models that require model specific Analogue or CAN-bus wiring solutions

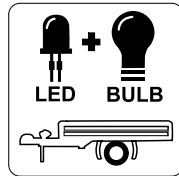

## Multi Model Compatibility

This multi-model E-Kit by ERICH JAEGER serves as an interface between towing vehicle and trailer. The kit fits nearly all cars that do not require vehicle specific CAN-bus solutions. If you are unsure if your vehicle requires a model specific CAN-bus solution, go to our website catalogue using the link shown at the bottom of this page to see if a vehicle specific solution exists for your vehicle.

- Superior corrosion protection
- Easy to install, no tools required
- Socket is watertight (IPX9K and IPX7) by lamella seal and single wire seals
- Completely tested according to Australian Standard AS 4177.5
- Cover seal for dust and splash water protection
- Separate contact insert with primary and secondary locking

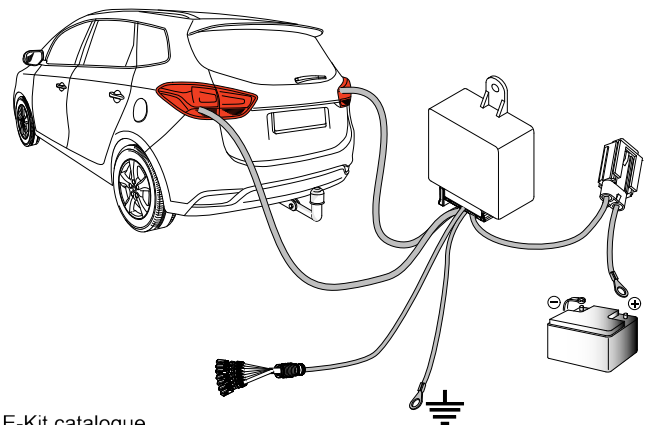

- LED Compatible
- Brake controller connection point supplied
- Tested to work seamlessly with Spectrum™ brake controller technology
- Plug and Play brake controller installation when fitted with connection harness 529008.

Specifications	750033EJ
Version	AU/NZ
Voltage	9 -15V
Pins	7
Quiescent Current	< 3mA
Temperature Range	-40 to 85°C

### LED Compatible

Optional Brake Control connection harnesses also available. Go to our website for more details.
